PATENT COOPERATION TREATY

From the INTERNATIONAL SEARCHING AUTHORITY

To: KLARQUIST SPARKMAN, LLP

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL SEARCH REPORT AND

Attn. Rupert, Wayne One World Trade Center, Suite 1600 121 S.W. Salmon Street Portland, Oregon 97204 UNITED STATES OF AMERICA	THE WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY, OR THE DECLARATION				
	(PCT Rule 44.1)				
	Date of mailing (day/month/year) 12/10/2005				
Applicant's or agent's file reference					
4239-6822603	FOR FURTHER ACTION See paragraphs 1 and 4 below				
International application No.	International filing date (day/month/year)				
PCT/US2005/019678	03/06/2005				
Applicant	DOCKETED FOR: 12/12/05, 1/12/06				
THE GOVERNMENT OF THE UNITED STATES OF A	MERICA				
1. X The applicant is hereby notified that the international search	h report and the OMPUTER the the April Searching				
Authority have been established and are transmitted herew	BOOK				
Filing of amendments and statement under Article 19: The applicant is entitled, If he so wishes, to amend the clair	ms of the International Application (see Rule 46):				
When? The time limit for filing such amendments is no	mally 2 month Shorn the date of transmittal of the edetails, see the notes on the accompanying sheet.				
Where? Directly to the International Bureau of WiPO, 3					
1211 Geneva 20, Switzerland, F For more detailed instructions, see the notes on the acc	ascimile No.: (41-22) 740.14.35				
	h report will be established and that the declaration under International Searching Authority are transmitted herewith.				
3. With regard to the protest against payment of (an) addition	ional fee(s) under Rule 40.2, the applicant is notified that:				
the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.					
no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.					
4. Reminders					
Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90 <i>bis</i> .1 and 90 <i>bis</i> .3, respectively, before the completion of the technical preparations for international publication.					
The applicant may submit comments on an Informal basis on the written opinion of the International Searching Authority to the International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination report has been or is to be established. These comments would also be made available to the public but not before the expiration of 30 months from the priority date.					
Within 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed acts for entry into the national phase before those designated Offices.					
In respect of other designated Offices, the time limit of 30 mont months.	ths (or later) will apply even if no demand is filed within 19				
See the Annex to Form PCT/IB/301 and, for details about the age of Guide, Voiume II, National Chapters and the WIPO Internet site

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international politication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the International application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
 "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers;
 claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- (Where originally there were 15 claims and after amendment of all claims there are 11): "Claims 1 to 15 replaced by amended claims 1 to 11."
- 3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]: "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

SECTION V

- 1 Reference is made to the following documents:
 - D1: SCHNEERSON R ET AL: "PREPARATION, CHARACTERIZATION, AND IMMUNOGENICITY OF HAEMOPHILUS INFLUENZAE TYPE B POLYSACCHARIDE-PROTEIN CONJUGATES" JOURNAL OF EXPERIMENTAL MEDICINE, TOKYO, JP, vol. 152, no. 2, 1 August 1980 (1980-08-01), pages 361-376, XP000674381 ISSN: 0022-1007 (cited by the applicant)
 - D2: TE PIAO KING ET AL: "PREPARATION OF PROTEIN CONJUGATES VIA INTERMOLECULAR HYDRAZONE LINKAGE" BIOCHEMISTRY, AMERICAN CHEMICAL SOCIETY. EASTON, PA, US, vol. 25, 1986, pages 5774-5779, XP001015547 ISSN: 0006-2960 (cited by the applicant)
- 1.1 Document D1 discloses a method for making an immunogenic conjugate comprising a hapten or an antigen covalently linked to a carrier, the method comprising: reacting a first agent with a dihydrazide resulting in a hydrazino-modified first agent, wherein the first agent is a hapten, an antigen or a carrier (e.g. bovine serum albumin, hemocyanin, diphtheria toxin) (page 363, lines 27-33); activating a second agent with CNBr, wherein the second agent is a hapten or an antigen (Haemophilus influenzae type b capsular polysaccharide) (page 363, lines 36-39); and reacting the hydrazine-modified first agent with the CNBr-activated second agent resulting in an immunogenic conjugate comprising a hapten or an antigen covalently linked to a carrier via a hydrazone linkage (page 363, lines 39-41). The immunogenic conjugates disclosed in document D1 have the following structure: carrier linking group hapten/antigen, whereby the linking group contains a hydrazone and a hydrazo bond.
- 1.2 Document D2 discloses a method for making protein conjugates, the method comprising: reacting a first protein (e.g. ovalbumin) with a hydrazide resulting in a hydrazino-

modified first protein (page 5775, left-hand column, lines 27-36); reacting a second protein (e.g. ovalbumin) with a benzaldehyde compound resulting in a benzaldehyde-modified second protein (page 5775, right-hand column, lines 13-19);

and reacting the hydrazine-modified first protein with the benzaldehyde-modified second protein resulting in a protein conjugate comprising a hydrazone linkage (page 5775, right-hand column, lines 27-38).

- In the method disclosed in document D1 the second agent is activated with CNBr in stead of modification with benzaldehyde as in the method of claim 1. Therefore, the linking group of the immunoconjugates of document D1 does not comprise a benzoylene moiety. In the method disclosed in document D2 a hydrazide is used in stead of a dihydrazide to modify the first agent. Therefore, the linking group of the protein conjugates of document D2 contains a benzoylene moiety and a hydrazone bond, but no hydrazo bond. Thus, the subject-matter of claims 1-16 is novel in the sense of Article 33(2) PCT.
- Though, the present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-16 does not involve an inventive step in the sense of Article 33(3) PCT for the following reasons.
- 3.1 Document D1 is regarded as being the closest prior art to the subject-matter of claims 1-16.
- 3.2 The subject-matter of claim 1 differs from this known document D1 in that benzaldehyde is used to modify the second agent before linking both agents. Consequently the immunogenic conjugate synthesized according to the method of claim 1 and claimed in claim 8, has a linking group comprising a benzoylene moiety.
- 3.3 The problem to be solved by the present invention may therefore be regarded as providing an alternative method for linking two agents to produce an immunogenic conjugate, wherein the first agent is modified with dihydrazide.
- 3.4 Document D1 discloses a method for making immunogenic conjugates wherein a

dihydrazide is used for linking an antigen or hapten to a carrier. Document D2 discloses a method for making protein conjugates wherein a hydrazide and benzaldehyde are used for linking two proteins. Therefore, the skilled person would, without the need to exercise inventive skill, be aware from document D2 that benzaldehyde can be used for modifying an agent and linking it to an agent with a hydrazino-group to make immunogenic conjugates as claimed in claim 1.

- 3.5 Therefore the solution proposed in claim 1 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT).
- 3.6 The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claim 8, which therefore is also considered not inventive.
- 3.7 Dependent claims 2-7 and 9-16 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step.

SECTION VIII

1 The subject-matter of claims 15 and 16 is not clear, since these entity claims refer to a method claim.
